Demonstration ocular tube

Endoscopic Coupler with Sock able Camera

Surgical Microscope for ENT Surgeons

Type	: Galilean
Magnification	: 4X, 6X, 9.5X, 15X, 24X
Field of View	: Ø 60 mm to Ø 10 mm
Illumination	: Achromatic dual beam shadow free spot
Light Source	: Cold light through fiber-optic light guide
Bulb	: Reflector type halogen bulb 15V 150W
Illumination field	: 53 mm (Ø)
Light intensity	: 80000 LUX max.
Filter	: Built in heat absorbing filter (Blue, Green optional)

Surgical Microscope for Ophthalmic Surgeons

Type	: Galilean
Magnification	: 4.5X, 7.5X, 11.5X, 18.5X, 29.5X
Field of View	: Ø 49 mm to Ø 8 mm
Illumination	: Achromatic shadow free spot
Light Source	: Cold light through fiber-optic light guide
Type	: Reflector type halogen bulb 15V 150W (24V 250W optional)
Illumination field	: 48 mm (Ø)
Light intensity	: 80000 LUX max.
Filter	: Various filters are available

Surgical Microscope for Colposcope

Type	: Galilean
Magnification	: 2.7X, 4X, 6.7X, 10.7X, 16.7X
Field of View	: Ø 49 mm to Ø 8 mm
Illumination	: High efficiency fiber optic coaxial illumination
Built in Light Source	: Twin bulb 15V 150W halogen
Penta arm rotation	: 0° to 240°
